

# Master course in **PHOTOCHEMISTRY** & **MOLECULAR MATERIALS**

## 5 reasons why you should enrol

**1**

Be part of a legacy. Our Department is where photochemistry was brought to life and still maintains its reputation as a leader in the field.

**2**

This is the first and only master of its kind in Italy taught entirely in English by internationally renowned professors who are at the forefront of ground-breaking research.

**3**

We offer a stimulating learning environment where students can meet and engage with world-leading scientists.

**4**

We provide exciting internships through our extensive network of universities and research centres across Europe and beyond.

**5**

We will prepare you for careers in high-tech companies in the fields of energy, environment and health, as well as prestigious international PhD programmes.
